Proficient

Node.js (4y), JavaScript (8y)
TypeScript (5y), HTML, CSS,
Sass, Less, MacOS, VScode

Intermediate

PHP (3y), Tailwind, Linux,
Windows, Bash

Beginner

C# (1.5y)

Platform, Framework development & Administration:

Proficient

NestJS (3y), Angular (7y),
React (5y), Next.js (2y),
Ionic (6y), MySQL, MongoDB,
Jest, Karma, Jasmine,
SwaggerJS

Intermediate

ExpressJS, Zend, SQL Server,
GitHub, Bitbucket, GitLab, Jira,
Stripe, Paypal

Beginner

Vue.js, .NET, Apache, Nginx,
Redis, Socket.io, Magento,
Elastic Search

Containers & Cloud:

Intermediate

Docker, Apple Developer,
Google Console, Ionic Appflows

Beginner

Firebase, AWS

Architectures:

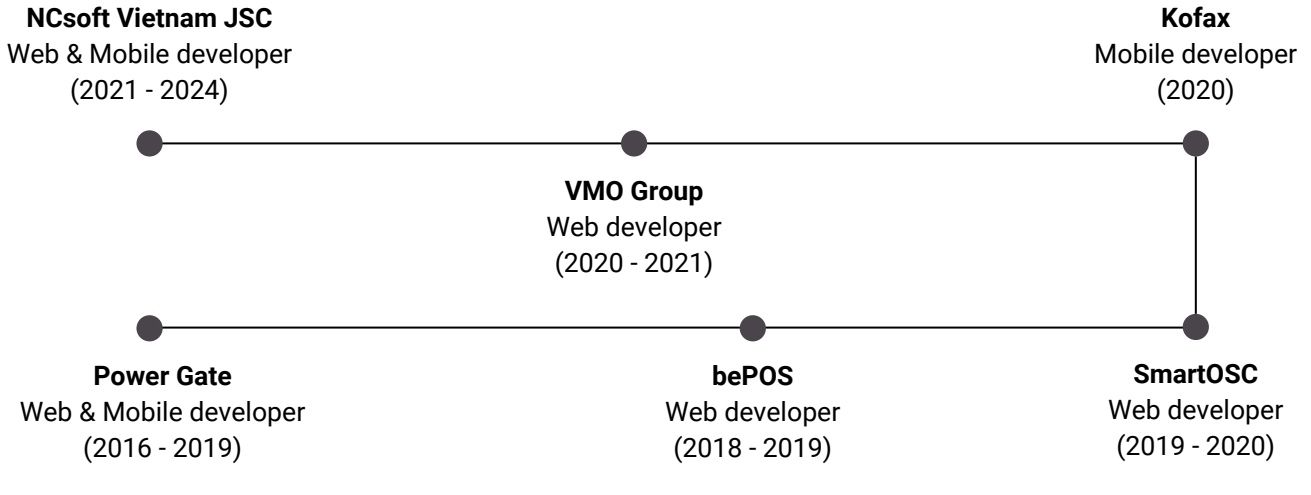

Intermediate

RESTful APIs, Load Balancing,
SOLID

Beginner

Multiservices

EXPERIENCE

PROJECTS

Xplor Triib **Web & Mobile developer**

2021 - 2024

Product link: <https://triib.com>

Business Type: ERP, Gym studio platform

Business Models: B2B

Team size: 8 (6 devs - 2 QAs)

Role: Sub leader

Tech stacks: Zend, MySQL, Angular, Ionic, Karma, Jasmine, AWS, Firebase, Stripe, PayPal, Redis, Socket.io, Docker, Apple Developer, Google Console, Ionic Appflows, Swagger

Xplor Triib is a comprehensive fitness and wellbeing platform designed to support gyms, studios, and fitness boutiques. Its main features include: Online Store, Online Booking Schedule, Customer Data Management, Payment Integration (Stripe, PayPal, Credit Card, Bank Account, etc...), Financial Management and Reporting.

Responsibility:

- Rewrite the mobile app from AngularJS & Ionic 1 (JavaScript) to the latest Angular & Ionic (TypeScript)
- Develop and maintain both Web and Mobile applications (Backend and Frontend), including features, bug fixes, documentation, test cases, unit tests, and integration tests
- Participate in system and database design to ensure they meet project requirements
- Work with CI/CD for deployment
- Create coding processes and release processes, review source code following project conventions and SOLID principles, and publish code to Production
- Organize daily meetings with team members and provide daily reports to the Team Leader and Product Team

Forest land management **Web developer**

2022 - 2024

Product link: Private

Business Type: ERP, Map

Business Models: N/A

Team size: 2 devs

Role: Sub leader

Tech stacks: NestJS, MongoDB, React, Jest, Docker, Redis, Swagger

The Forest Land Management System (FLMS) is a powerful tool for sustainable forest management. Key features include geographic information management with digital maps, forest health monitoring via satellite data, detailed planting and harvesting planning, and biodiversity tracking. FLMS helps enhance the efficiency of forest management and conservation efforts.

Responsibility:

- Develop a web app using ReactJS
- Collaborate with NestJS on the backend
- Participate in system and database design so that they match project requirements
- Perform unit tests, integration tests, and create test cases. Review source code before deployment, ensuring adherence to the project's coding conventions and SOLID principles
- Develop key features such as Map and Reporting
- Provide daily reports to the team leader

Setel

2020 - 2021

Web developer

Product link: https://www.setel.com/PETRONAS-Shop?utm_medium=setelweb

Business Type: E-commerce

Business Models: B2C

Team size: 3 teams, working in a team with 5 members (4 devs - 1 QA)

Role: Member

Tech stacks: NestJS, MongoDB, React, Next.js, Jest, Redis, Socket.io, Multiservices, Elastic Search, Swagger

The PETRONAS Shop on Setel offers a range of PETRONAS products, including fuels, lubricants, and other automotive essentials. It provides a convenient way for customers to purchase these items online, enhancing their shopping experience. The platform integrates with Setel's payment options, ensuring secure and seamless transactions

Responsibility:

- Develop an Admin site using ReactJS
- Create an E-commerce site using Next.js
- Work on multiservice APIs with NestJS
- Perform unit tests, integration tests, and create test cases; review source code before deployment, adhering to the project's coding conventions and SOLID principles
- Develop key features such as Order, Payment, Promo, and Inventory
- Provide daily reports to the team leader

Kofax Power PDF Mobile

2020

Mobile developer

Product link: https://play.google.com/store/apps/details?id=com.kofax.Power.PDF&hl=en_US&pli=1

Business Type: Cloud-based platform

Business Models: B2B

Team size: 5 (3 devs - 2 QA)

Role: Member

Tech stacks: .NET, SQL Server, Angular, Ionic

Kofax Power PDF Mobile is a versatile app that allows users to view, edit, and share PDF files directly from their mobile devices. It supports various features such as form filling, digital signatures, document renaming, and multi-document management

Responsibility:

- Develop a mobile app
- Implement a key feature: connecting the mobile app with a printer
- Provide daily reports to the team leader

ConnectPOS
Web developer

2019 - 2020

Product link: <https://www.connectpos.com>

Business Type: Cloud POS

Business Models: B2B, B2C

Team size: 7 (5 devs - 2 QAs)

Role: Member

Tech stacks: Magento, Angular, React

ConnectPOS is a cloud-based Point of Sale (POS) system for omnichannel retail operations. It integrates seamlessly with popular e-commerce platforms like Shopify, Magento, BigCommerce, and WooCommerce. The platform offers features such as real-time inventory management, customer insights, and multi-location management channels

Responsibility:

- Create a Single Page Application (SPA) web app using ReactJS for consumers
- Rewrite the POS web app from old Angular to the latest Angular
- Develop new features, including writing documentation, test cases, unit tests, and integration tests
- Work with the backend using Magento
- Review source code before deployment, following the project's coding conventions
- Provide daily reports to the team leader

bePOS
Web developer

2018 - 2019

Product link: <https://bepos.io>

Business Type: Cloud POS

Business Models: B2C, B2B

Team size: 5 (3 devs, 1 QA, 1 BA)

Role: Member

Tech stacks: Node.js, Firebase, MongoDB, React

bePOS is a comprehensive digital transformation and business management app designed to simplify operations for various business models such as F&B, retail, and beauty salons. It offers features like digitizing sales processes, integrated solutions on a single platform, and business funding with favorable interest rates

Responsibility:

- Develop a POS web app using ReactJS
- Implement a salary & commission calculation feature within the application
- Work with Node.js & Firebase Cloud API on the backend

B8AK
Web & Mobile developer

2017 - 2018

Product link: <https://apps.apple.com/vn/app/b8ak-%D8%A8%D9%8A%D8%AA%D9%83-home-services-app/id1017413686>

Business Type: Home Services

Business Models: B2B

Team size: 6 (4 devs - 2 QA)

Role: Member

Tech stacks: .NET, SQL Server, Angular, Ionic

B8ak is a home services app offering a variety of services including electrical work, plumbing, AC maintenance, and beauty services like pedicures and massages. Users can book these services quickly and easily. Available in several cities in Saudi Arabia and Bahrain.

Responsibility:

- Develop a mobile app using Angular & Ionic
- Collaborate with .NET on the backend
- Provide daily reports to the team leader

Fanfood

2016 - 2017

Web & Mobile developer

Product link: <https://www.fanfoodapp.com>

Business Type: E-commerce, Food delivery

Business Models: B2C

Team size: 4 (3 devs - 1 QA)

Role: Member

Tech stacks: .NET, SQL Server, Angular, Ionic

FanFood is a mobile and web-based ordering platform designed for venues such as sports arenas, schools, and entertainment venues. It allows guests to place food and beverage orders for pickup or delivery within the venue, reducing wait times and improving the overall guest experience. The platform includes features like contactless order and payment, real-time inventory management, and a customizable catering portal

Responsibility:

- Develop a mobile app using Angular & Ionic
- Implement a web app using Angular & .NET
- Provide daily reports to the team leader

PERSONAL PROJECTS

Youtube Sharing app

7 days

Web developer

Product link: <https://www.fanfoodapp.com>

GitHub links: <https://github.com/hoangchuongit/api-youtube-sharing-app> (BE),

<https://github.com/hoangchuongit/web-youtube-sharing-app> (FE)

Tech stacks: NestJS, MongoDB, Next.js, Jest, Docker, Socket.io, Swagger

The Web YouTube Sharing App is a platform built with NestJS & Next.js that allows users to register, log in using JWT, and share YouTube videos. It includes features like real-time notifications for new video shares using WebSockets. The app is designed with Docker for local deployment and includes comprehensive testing modules

Key Features & Development:

- Generate Mobile API documentation using SwaggerJS
 - Implement Login/Signup functionality using JWT & Private routes
 - Enable real-time notifications using Socket.io
 - Conduct unit tests and integration tests for both NestJS and Next.js
 - Manage commit conventions and formats with Husky & Commitlint
-

EDUCATION

University of Transport and Communications

2013 - 2017

Major: Information Technology

Degree: Pretty Good
